Craftsmanship & Quality

Manufacturing Custom Shower Doors Since 1960

Manufacturing Custom Shower Doors Since 1960

Martin Shower Door, Inc. has manufactured custom shower doors for the greater Los Angeles area since 1960, specializing in custom units for residential applications. We are among the industry leaders with our original design for the 1/4" frameless clamp hinge (1990) and the self-leveling roller bracket for 3/8" sliders (patent pending 2004).

All Martin Shower Doors are fabricated with high quality aluminum extrusions, tempered safety glass and premium hardware for many years of dependable service. A

variety of standard and custom metal finishes, glass types, accessories and etched designs allow you to individualize every bathroom in your home.

Martin Shower Door is the professionals choice. Our network of distributors and professional installers service most areas of Los Angeles county, Orange county, Riverside county, San Bernardino county and San Diego county. Visit our website www.martinshower.com for the location of your nearest installation professional.

Martin Shower Door Company offers two styles in $\frac{3}{8}$ " heavy glass shower doors.

Our series #180 units offer you the best water protection by using jamb mounted single-action (swing out only) hinges and also a jamb on the strike side to protect against water leakage.

Our series #190 units provide a streamline style utilizing wall mount dual-action hinges that swing in and out. These units have no jambs to obstruct the door movement.

All units come standard with low profile "U" channel to secure the stationary panels.

Optional glass clamps are available on series #190 units. Ask your dealer for the cost of this upgrade.

Model #180 Shower Door

Update your shower using 3/8" tempered glass and bring an elegant style to your bathroom. Jamb-mounted hinges and an aluminum strike jamb provide protection from water leakage. A through-the-glass handle and a bottom drip/sweep are standard features with this model. (Shown here with optional 8" offset handle and arched top glass)

Maximum opening size 36" wide and 96" high. Door height over 78" high will require a third hinge. Optional handle styles are available on page 18.

Handle

Hinge

Model #190 Shower Door

Choose this 3/8" tempered glass door to add a contemporary style to your shower. Two dual-action hinges allow the door to swing in and out. A through-the-glass handle and a bottom drip/sweep are standard features.

Maximum opening size 36" wide and 96" high. Door height over 78" tall will require a third hinge. Optional hinge and handle styles are available on page 18.

Handle

Hinge

Model #187W Door and Inline Panel

Bring a modern style to your bathroom with this 3/8" tempered glass shower door. The panel is held in place with aluminum channel. Jamb-mounted hinges and a strike jamb provide protection from water leakage. This unit is designed with a header at the top to provide maximum support to the panel. A through-the-glass handle and a bottom drip/sweep are standard features with this model.

Maximum door size 36" wide x 96" high. Openings wider than 90" will require an extra inline panel; unit heights over 78" tall will require a third hinge. Optional handle styles are available on page 18.

Handle

Hinge

Model #197W Door and Inline Panel

Select this 3/8" tempered glass unit to add a distinctive style to your shower. The panel is held in place with aluminum channel (optional glass clamps can be used instead of channel). Two dual-action hinges allow the door to swing in and out. A through-the-glass handle and a bottom drip/sweep are standard features.

Maximum door size 36" wide x 96" high. Openings wider than 90" will require an extra inline panel; unit heights over 78" tall will require a third hinge. Optional hinge and handle styles are available on page 18.

Hinge

Model #189W Door, Inline Panel and Return Panel

This unit brings an elegant style to your shower using 3/8" tempered glass. The panels are held in place with aluminum channel. The unit is designed with a header at the top to provide maximum support to the panels. Jamb-mounted hinges and a strike jamb provide protection from water leakage. A through-the-glass handle and a bottom drip/sweep are standard features with this model.

Maximum door size is 36" wide x 96" high. Unit heights over 78" tall will require a third hinge. Optional handle styles are available on page 18.

Handle

Hinge

Model #199W Door, Inline Panel and Return Panel

Add a touch of luxury to your bathroom with this enclosure using 3/8" tempered glass. The panels are held in place with aluminum channel (optional glass clamps can be used instead of channel). Two dual-action hinges allow the door to swing in and out. A through-the-glass handle and a bottom drip/sweep are standard features.

Maximum door size is 36" wide x 96" high. Unit heights over 78" tall will require a third hinge. Optional hinge and handle styles are available on page 18.

Handle

Hinge

Model #191

Showcase your neo-angle shower with our 3/8" tempered glass enclosure. The stationary panels are held in place with aluminum channel (optional glass clamps are available). Two dual-action hinges allow the door to swing in and out. A through-the-glass handle and bottom drip/sweep are standard features. Units with the door in the center will require a header to support the hinge panel.

Maximum door size is 36" wide. Door height over 78" will require a third hinge. Optional hinge and handle styles are available on page 18.

1/4" Frameless Units

Martin Shower Door's line of 1/4" semi-frameless enclosures offer you the look of heavy glass for a lot less money. Low profile extrusions provide the minimum metal necessary for maximum visual impact. Exposed glass edges are high polished for an elegant effect. Doors have jamb mount hinges, slip-on handle, strike jamb and bottom sweep for water protection. Sliding panels have slip-on handle or towel bar and full width bond-on hanger rails with high quality nylon rollers for smooth travel. A variety of standard and custom metal finishes, glass types, optional accessories and etch designs offer infinite possibilities for customizing your bathroom.

We offer a variety of standard metal finishes and we are able to provide custom finishes on a special order basis.

We also offer a variety of tempered safety glass choices. We are able to provide specialty glass on a special order basis.
